

A tent for soldier reenactors.

2 masts - height 205cm, combined with a horizontally mounted pole which makes the construction stable. The length between the masts is 1,5m.

No guy ropes; there are only loops on the edge of the tent which must be pinned to the ground. Oval entrance which can be closed with a curtain.

In our standard we use cotton (about 350g/m2) with waterproof impregnation.

Available modifications		
	Additional colour	Standard colour
		One additional colour
		Two or more additional colours
	Windshield
