

The construction of the tent is based on 2 vertical masts and one horizontal pole (for easier transport every pole is made from 2 parts binded with pegs and a rope).

There are no guy ropes needed to mount the tent, the construction holds up on the pins, what makes

it easy to mount when there's not much place available.

The front part may be raised up and used as a shed. This tent can also be used as a small stall.

In our standard we use cotton (about 340g/m2) with waterproof impregnation.

Available modifications	
	Windshield
	Coloured tape

The set consists of:

- tent sheet
- 2 x 2-part mast of 235 cm
- 2-part horizontal strenghtening pole of 325 cm
